## INVENTORY

### WHAT IS IT FOR?

The main purpose of the Inventory is to have a record of the details included in the library completed, in progress, and missing. The spreadsheet has two areas: "Detail Identification", and "Detail Refresh Process Status."

### OBJECTIVES

A large part of the drawings done in documenting a project are very similar to drawings that have been done before. The detail library is a depository of the information that can be re-used safely and easily, that has been tech-checked, and is organized for easy access.

### COLUMNS 1, 2, 3, 4 and 5

#### Detail Identification:

**COLUMN 1** just numbers

**COLUMN 2** is the **Masterspec** number which is the number of the specifications sections that describe the assembly.

**COLUMN 3** is the **Uniformat** number assigned to each detail (see module on Uniformat).

**COLUMNS 4 and 5** are the assembly type and the title of the detail

Architectural Woodwork																
					INDUSTRY STANDARDS - Woodwork includes Cabinets, Paneling, and Trim. PANELING IS LISTED UNDER "FINISHES". The associations which regulate architectural woodwork are the AWI (Architectural Woodwork Institute) and the WI (Woodwork Institute - California only). Both associations have adopted the AWI Architectural Woodwork Standards, 7th edition, which can be downloaded for free from the following link: <a href="http://woodworkinstitute.com/wp-content/uploads/2015/05/Sec10_2ndEdAWIS_SmBkMkrd_141001-3.pdf">http://woodworkinstitute.com/wp-content/uploads/2015/05/Sec10_2ndEdAWIS_SmBkMkrd_141001-3.pdf</a>
